Instructions:

Flatten one end of the ball against the table so it can't roll.

Put a stick into the top for the stem of the pumpkin.

Mix the CelluClay according to package instructions. Spread onto the ball. Dip your fingers in water and smooth out the lumps in the clay. You can also make ridges to add texture to the pumpkin.

Set aside to dry.

Paint the pumpkins gold and the stems black.

Add a little Mod Podge to the top of the pumpkin and dust with gold glitter.
